Please take the measurements

of the dog in CM

	Animal Measurements	Cart Dimensions (K9 Carts Use)
A. Rear height from top of the hips to the floor.		
B. Length of back from shoulder blades to base of tail.		
C. Inside distance from heel of the front foot to toes on the back foot		
D. Girth or circumference around the chest – right behind the front legs.		
E. Front height from top of shoulders to floor.		
F. Width of shoulders straight across.		
G. Width of hips straight across.		
H. Groin to floor (whilst standing)		
Additional measurements for the fully supportive cart		
I. Height of front leg, chest to floor		
J. Height of hind leg, groin to floor		
K. Point of shoulders to point of hips		

Criteria for Successful Use of a Pet Wheelchair
 • **General health should be excellent.**

- **Strong front legs (should be able to go up and down a couple of steps with front legs while rear legs are being supported) needed for use of a standard 2-wheel cart.**
- **Weight should be reasonable for breed and age of pet.**
- **Your pet must have the desire for increased mobility**

If you are not sure whether your pet is a candidate for a cart, please call our qualified staff.
